

To Parents of 8th-grade students,

Graduation may seem a ways off, but planning for your student's future begins now!

Your students recently completed career interest and preference surveys, the first step in their High School and Beyond Plan. Students will use this information to inform classes they want to take, and careers they want to explore, as they enter high school. We encourage families to participate with their students as they make these important decisions for their futures!

The High School and Beyond Plan process is a graduation requirement that supports students in exploring their interests, planning high school coursework that is aligned to those interests, keeping track of major assessment scores, and logging work and other relevant experience. The Plan is designed to enable students to successfully pursue education or training after they graduate high school.

Follow the steps to help your student access their High School and Beyond Plan anytime on their Launchpad.

From Launchpad, click the 4-Year Plan button.

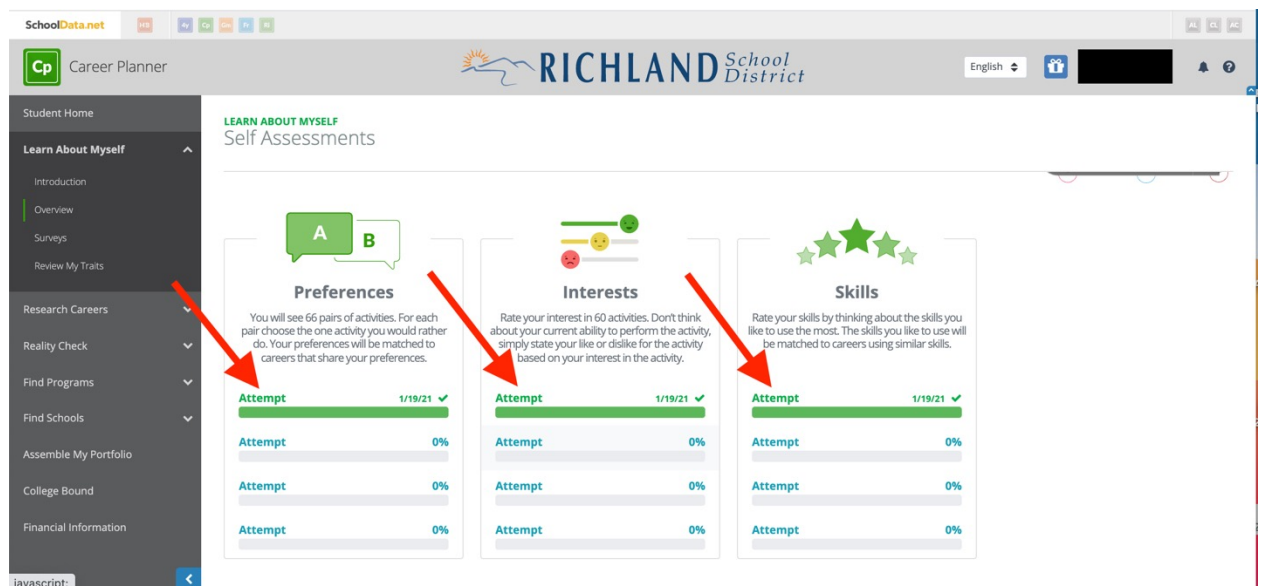

Preference and Interest Surveys are in the green **Career Planner** button.

Find the surveys and results under **Learn About Myself** on the left menu. Then click **Overview**.

Get results by clicking on the **attempt** button.

Results show detailed information and connect students to a variety of careers! Some of these might be well known, and you may find some surprises that your student did not consider!
